

August 23, 2007

To Whom It May Concern:

Our company retained CMBSC to rehabilitate our manufacturing facility due to the damage from Hurricane Wilma. They completely replaced all the outer walls and roof in our 21,600 sq. ft. building. They also welded in over 200 purlins to bring the building up to Miami-Dade building code.

CMBSC handled the project very professionally. They adhered to the budget and timeline to complete the project.

We would highly recommend CMBSC .

Sincerely;

A handwritten signature in black ink that reads "T. Walter Shields".
