Re: Commercial Metal Building Services Corp.

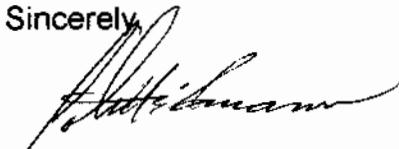

To Whom It May Concern:

We have used Commercial Metal Building Services Corp. to erect a number of our buildings and are very satisfied with their steel erection capabilities. Their workers are skilled in steel erection procedures and methods. They provided adequate erection equipment for the project and follow excellent safety guidelines for their employees.

I personally have been involved in the construction of pre-engineered steel buildings for approximately thirty (30) years and feel they have some of the best trained employees in the industry. The ability of the onsite supervisors to "problem solve" is next to none.

We will definitely use Commercial Metal Building Services Corp. on future projects.

Sincerely,

John Heidmann, President
